WEATHERBOND
ROOFING SYSTEMS

Single-Ply Simplified

Designed With You in Mind

Specifically designed with the homeowner and residential applications in mind, WeatherBond offers a wide range of competitively priced, and nationally distributed single-ply roofing systems. WeatherBond membranes have been field tested for decades with long-term exposure to UV and ozone resulting in excellent long-term results. WeatherBond Systems are economical to install and offer easy maintenance for homeowners. Whether it's a beautiful roof, a timely installation, or simply the right product for the right application, WeatherBond offers Single-Ply Simplified.

WeatherBond **EPDM**

A Durable Choice

WeatherBond's EPDM membrane has been a proven performer for 40 years and counting. It's ease of installation and long-term durability make it a favorite among commercial roofers. EPDM membrane can be easily repaired without the need for special equipment or tools. It is ideal for four season environments because it has the ability to expand and contract in wide temperature extremes.

WeatherBond **TPO**

Cool and Environmentally Friendly

WeatherBond's white TPO membrane is ENERGY STAR® compliant, reflecting the sun's heat, reducing the rooftop air temperature and helping to lower the demands placed on your air conditioning system. By reducing the amount of energy required to maintain cool building environments, WeatherBond TPO reduces the amounts of pollutants generated back into the atmosphere, which contributes to a cleaner, cooler environment. TPO membrane also provides superior wind, fire and chemical resistance, making it an excellent choice for almost every application.

WeatherBond **Polyiso**

Equals Energy Savings

A home that incorporates insulation into its overall roof design can save thousands in energy costs throughout the life of the roof. Because of its superior R-value and excellent energy-efficient properties, polyiso has become the industry's premier roofing insulation. Polyiso is compatible with all of WeatherBond's roof systems. In addition, WeatherBond offers a full line of other insulation products, including extruded and expanded polystyrene, fiberboard and much more.

WeatherBond **PVC**

Another Cool Roofing Option

WeatherBond's PVC is another cool roof option. Available in white, PVC has been a staple of the commercial roofing industry for decades. Its physical properties have made PVC the preferred choice of many schools and municipalities throughout the country.

WeatherBond offers a warranty that is unsurpassed in the industry by providing customers peace of mind with a Limited Lifetime Material warranty for residential applications. WeatherBond is fully committed to providing a quality product and we stand behind our promise 100%.

WeatherBond Residential Roofing Products Features and Benefits

Easy installation and maintenance:
