

To: WeatherBond Roofing Systems' Independent Sales Representatives and Distributors

WeatherBond Roofing Systems is pleased to introduce LIQUISEAL Liquid Flashing. This two-component, polyurethane-based system creates a reinforced, cold-applied liquid flashing that is compatible with all WeatherBond EPDM, TPO, PVC, and KEE HP membranes and is ideal for flashing oddly shaped penetrations and tying together dissimilar roofing systems without building a knee wall or impeding drainage.

LIQUISEAL Liquid Flashing is UV- and color-stable, solvent-free, low-VOC, and virtually odorless. Unlike PMMA-based products, LIQUISEAL Liquid Flashing is pre-measured and easy to use. WeatherBond is also pleased to introduce the following accessories and primers for use with LIQUISEAL Liquid Flashing:

- LIQUISEAL Metal Primer – Used to prime metal, EPDM, and other non-porous surfaces
- LIQUISEAL Concrete & Masonry Primer – Used with Surfacing Sand to prime concrete, masonry, and other porous surfaces
- Spiral Agitator – Used to mix resin properly
- Surfacing Sand – Used with Concrete & Masonry Primer to promote proper adhesion and mechanical bond.

| Product Code | Product Description | Stocking Location(s) | List Price | Package Quantity |
|--------------|--|----------------------|------------|------------------|
| 330890 | LIQUISEAL Metal Primer | C, G, T | \$568.38 | 15/ctn |
