

WeatherBond PVC

Roofing Systems

WeatherBond's PVC (Polyvinyl Chloride) Membrane is comprised of three layers: a PVC polymer bottom ply, a strong polyester-reinforced fabric center (scrim) and a tough thermoplastic PVC-compounded top ply. WeatherBond PVC is specifically designed for long-term performance and is produced with the strictest quality control measures providing building owners the most consistent and reliable PVC product on the market today. Seams and details are heat-welded to provide a long-lasting, water-tight roof.

Low Energy Consumption

WeatherBond PVC membrane's high reflectivity ratings and cool roof attributes help reduce the amount of energy required to maintain cool building environments. Less energy consumed results in less pollutants generated back into the atmosphere and directly contributes to a cleaner, cooler environment while reducing building cooling costs.

Not only does the membrane help reduce your building's energy costs and impact on the environment, it also helps extend the life of your roof. WeatherBond PVC membrane is puncture, fire and chemical resistant. Even in the harshest of environments, rest assured that WeatherBond PVC membrane can stand the test of time.

Time and Labor Savings

WeatherBond offers a full line of laborsaving, factory-tested PVC prefabricated accessories including pipe seals, walkway rolls and inside & outside corners, all of which were designed to help reduce the labor required to install a quality roof. By factory-fabricating these accessories, WeatherBond can ensure every detail has been quality tested to meet our requirements.

WeatherBond is Single-Ply Simplified.

WeatherBond PVC's Fully Adhered and Mechanically Attached Systems:

- Available in sheet widths of 40.5", 81", 5' and 10'
- Limited Lifetime Material Warranty available
- 15- or 20-year membrane material warranty
- ENERGY STAR®-qualified material
- Enhanced physical property characteristics for long-term weatherability
- Excellent chemical resistance to acids, bases, restaurant oils and greases
