

Container Recycling Program with CleanEarth™

WeatherBond has partnered with Clean Earth to offer an exclusive program that provides a low-cost and eco-friendly disposal option for empty CAV-GRIP® III, CAV-GRIP PVC, CAV-PRIME V-150 Primer, CAV-PRIME Low-VOC EPDM and TPO Primer, CAV-PRIME TPO Primer, and Flexible DASH™ Dual Tanks, 15-Gallon and 50-Gallon Drums. - **Flexible DASH 15-Gallon and 50-Gallon Drums must be empty prior to shipment.**
- Shipments must contain at least **the required minimum quantity** or a \$100 fee will be assessed. There is no maximum cap limit for the number of cylinders that can be shipped.

Cylinder Preparation

Please note that ALL cylinders must go through the following procedure to be accepted at a Clean Earth recycling facility.

Use eye protection and impervious gloves.

- 1 Follow the disposal steps outlined on the Technical Data Bulletin (TDB).
- 2 Once cylinders are empty and vented, carefully puncture the friable disk or knockout valve on the top of the cylinder.
- 3 Cylinders should then be packaged for shipment to the recycling facility. Cylinders are to be placed on a pallet and stretch wrapped or placed in a gaylord shipping box.
