WeatherBond EPDM
Peel & Stick Roofing System

WeatherBond PAS EPDM
Non-Reinforced EPDM Membrane

WeatherBond’s Peel & Stick (PAS) Non-Reinforced EPDM Membrane is available in Black and White and offers excellent weatherability and hail resistance, provides significant labor savings, and qualifies as a Low-VOC option with no solvent-related odors. WeatherBond PAS EPDM is a nominal 60-mil non-reinforced EPDM membrane laminated to a 100%-solid pressure-sensitive adhesive and is available in 10’ x 100’ and 10’ x 50’ (3m x 30m and 3m x 15m) rolls.

WeatherBond PAS Reinforced EPDM Membrane

WeatherBond’s Peel & Stick Reinforced EPDM membrane offers added puncture resistance, significant labor savings, and qualifies as a Low-VOC option with no solvent-related odors. WeatherBond PAS EPDM is a nominal 60-mil reinforced EPDM membrane laminated to a 100%-solid pressure-sensitive adhesive and is available in 10’ x 100’ and 10’ x 50’ (3m x 30m and 3m x 15m) rolls. The release liner is silicone-coated on one side for consistent release from the adhesive.

System Features And Benefits:
- Minimize disruption on occupied buildings from the speed of installation and a lack of bonding adhesive odor
- Splices are completed with time tested and trusted WeatherBond Pre-Applied Seam Tape
- Over 60 years of proven EPDM membrane performance
- Industry leading UV and hail resistance
- PAS membrane installs 4.8 times faster completing projects in less time
- Can be installed on steep slopes
- Up to 80% labor savings to help get the job completed quickly
- No fumes or odors to disrupt building occupants

Installation
WeatherBond Insulation is either mechanically fastened to the roof deck every two square feet, adhered with Flexible DASH Adhesive or other WeatherBond approved insulation adhesive. WeatherBond PAS membrane is adhered to the insulation. Adjoining sheets of EPDM are spliced together a minimum of 3” using WeatherBond’s 30-mil Peel & Stick Seam Tape.
