CAV-PRIME Membrane Primers

WeatherBond's CAV-PRIME system features primer in pressurized cylinders for faster application and less waste. The CAV-PRIME backpack, applicator attachment, and 3-foot extension gun make applying primer to seams and areas where Peel & Stick flashing is used up to 3 times faster than dunking a roller in a pail.

Features and Benefits

Reduces Labor and Waste:

- Quick, one-person application with spray gun and applicator attachment eliminates dunking a roller and moving a pail around the roof
- Backpack available to make application even faster and easier
- Increased coverage rate vs. traditional application of primer in pails

Eliminates Waste:

- No need to worry about primer curing in pails that are improperly sealed.
- Container eliminates potential spills or kicked-over cans of primer that create a mess and waste product.

Accessories

- Spray Guns and Hoses** – CAV-PRIME 3-foot extension guns are available to prevent having to bend over while applying primer. For the best ergonomics, 3-foot spray guns can be coupled with 6-foot hoses. Spray gun with 24" extension and 12-foot or 18-foot hoses can also be used.
- Applicator Attachment** – The CAV-PRIME Applicator Attachment clamps onto the spray gun and is threaded to fit most standard roller cages.
- Backpack** – The CAV-PRIME backpack makes it easy to carry a cylinder while applying long runs of primer for seams and cover strip.
- CAV-PRIME Hose & Gun Cleaner (not pictured)** – Used to flush hoses and guns for storage, it can also be used to clean up excess primer on the roof or soak spray tips for cleaning.

*NOTE: NEVER USE LOW-VOC UN-TACK™ CLEANER WITH CAV-PRIME.
