WeatherBond

Plastic Locking Insulation Plates

Overview

WeatherBond Roofing Systems' Plastic Locking Insulation Plates are Factory Mutual approved. WeatherBond's 2" (50 mm) HPW Polymer plates should be used for EPDM lap seam fastening. WeatherBond's 3" (75 mm) plates should be used when fastening insulation. All WeatherBond plates are round and designed to be used with WeatherBond fasteners.

Application

- 2" (50 mm) HPW Polymer Plate: Attaches EPDM with Peel & Stick Seam Tape single-ply membrane to the substrate in a mechanically-attached roofing system. Uses WeatherBond #14 HPW fasteners.
- 3" (75 mm) Locking Plastic Plate: Attaches insulation to the substrate.
 Uses WeatherBond #12 Standard Insulation Fastener or WeatherBond #14
 HPW fastener.

Approvals

Check with roofing system manufacturer for FM approvals.

Factory Mutual listings refer to these products as: WeatherBond Plastic Insulation Plate 3" and 2" Barbed Plastic Seam Plate.

Typical Properties and Characteristics

Product	Size* in (mm)	Material	Pkg Quantity	Weight Lbs (KG)
