4.5	11.2%	0.0%	11.2%

Post-Consumer Recycled Content is consumer waste that has become a raw material (feedstock) for another product (e.g.; glass, plastic, aluminum cans, etc.)

Pre-Consumer (Formally Known as Post-Industrial Recycled Content) is output from a process that has not been used as part of a consumer product, that is sold, traded or exchanged under commercial terms as feedstock for another industrial process, and that would have otherwise be landfilled, incinerated or somehow disposed of as a waste.
