

CAV-GRIP® for PVC Membranes
August 12, 2020

To: WeatherBond Roofing Systems' Independent Sales Representatives and Distributors

WeatherBond Roofing Systems is excited to introduce CAV-GRIP PVC Low-VOC Adhesive, a revolutionary new product that can be used for adhering standard PVC to a variety of substrates on both wall and field applications. A game-changing addition to WeatherBond's PVC product line, CAV-GRIP PVC Adhesive provides the following benefits:

- Fast tack time – typically less than half that of Low-VOC Bonding Adhesive
- Low-VOC formula with very low odor – compliant in all Low-VOC states
- Convenient spray application
- Wide window of application in temperatures as low as 35°F (2°C)
- Up to 60% labor savings when compared to installations using traditional bonding adhesives

CAV-GRIP PVC Adhesive is applied using a self-contained, pressurized spray system that provides quick, even coverage and requires minimal cleanup and maintenance. The system consists of a cylinder with a special attachment for the reusable hose and spray gun. Hoses and spray guns are each sold separately and can be cleaned using PVC UN-TACK, specifically for use with CAV-GRIP PVC.
