

**Thermoplastic Weldable Vents**  
**October 24, 2018**

WeatherBond Roofing Systems is pleased to announce additions to its line of WeatherBond TPO and PVC prefabricated accessories. WeatherBond now offers heat-weldable TPO and PVC One-Way and Two-Way Pressure Relief Breather Vents, Square Top Vents, and T-Top Vents. These vent offerings are pre-flashed, metal vents that are ready for installation. Available in standard white, these vents can also be custom-ordered in gray and tan.

One-Way Vents allow trapped air pressure to escape; Two-Way Vents (combined with One-Way Vents) help to reduce moisture.

T-Top vents are typically used to vent exhaust and fans such as those found in kitchens and bathrooms; however, they cannot be used for heated exhaust (a furnace, for example).

Square Top Two-Way Vents are designed for gravity—meaning static air only (no exhaust).

Product Code	Product Description	Stocking Location
326867	8" TPO Square Top Two-Way Vent	Direct Ship
326869	4" TPO T-Top Vent	Direct Ship
