

PVC/KEE HP Light Gray Polyester-Reinforced Membrane
November 18, 2019

To: WeatherBond Roofing Systems' Independent Sales Representatives and Distributors

WeatherBond Roofing Systems is pleased to introduce its new Light Gray Polyester-Reinforced PVC, KEE HP, and PVC Fleece membranes and accessories. Manufactured in Greenville, Illinois, WeatherBond's highly reflective Light Gray membranes meet California Title 24 requirements, can contribute to LEED credits, and can hide dirt accumulation.

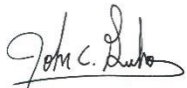

Polyester-reinforced membranes can be adhered or mechanically fastened and offer better tear strength, breaking strength, and puncture resistance than fiberglass-reinforced membranes. WeatherBond's Light Gray Polyester-Reinforced PVC and KEE HP meet or exceed the physical requirements of TYPE III and TYPE IV per ASTM D4434 Standard Specification for Polyvinyl Chloride Sheet Roofing.
