**CAV-GRIP III for use with EPDM**
**December 7, 2018**

**To: WeatherBond Roofing Systems' Independent Sales Representatives and Distributors**

WeatherBond Roofing Systems is excited to announce that CAV-GRIP III Low-VOC Adhesive/Primer can now be used to bond WeatherBond EPDM to horizontal substrates for warranty terms up to and including 20-year, 90-mph designs. CAV-GRIP III provides substantial productivity-boosting advantages on the jobsite:

- Can be used in temperatures as low as 25°F (-4°C)
- VOC compliant and very low odor
- Quick application with spray gun
- No stirring and easy clean-up
- Up to 60% labor savings compared to traditional bonding adhesive applications

CAV-GRIP III packaging options and supporting accessories are listed below.

| * Approximate double-sided adhesive application | | | | | **Hoses sold separately | |

CAV-GRIP III has proven to be popular in previously approved applications, including adhering WeatherBond EPDM membranes to vertical surfaces, adhering WeatherBond TPO membranes, and as a primer for VapAir Seal™ 725TR. Contractors who used CAV-GRIP III in the test market have raved about the speed and ease of application, as well as the dramatic reduction in flash-off time. WeatherBond encourages you to let your contractors prove it to themselves by using CAV-GRIP III on their next adhered EPDM project.
