

Flexible DASH Adhesive for Membrane Attachment
March 21, 2019

To: WeatherBond Roofing Systems' Contractors

Beginning January 1, 2020, WeatherBond will require the use of Flexible DASH Adhesive for all Fleece membrane attachment. Since its inception in 2008, Flexible DASH has steadily gained popularity because of its performance benefits. With the introduction of Flexible DASH dual tanks and five-gallon jugs, WeatherBond now offers one industry-leading product that can be used year-round for both membrane and insulation attachment.

Why Flexible DASH?

- **Runs cleaner:** Flexible DASH runs cleaner through high- and low-pressure spray equipment thanks to higher-performing raw materials.
- **One formulation for all seasons:** Because Flexible DASH can be applied in temperatures from 25–120°F, there is no need for separate winter- and summer-grade formulations.
- **Wider installation window:** Using Flexible DASH gives applicators up to five minutes to install insulation or membrane.
- **Enhanced flexibility:** Flexible DASH offers up to 150% elongation, far greater than the 10–30% claimed by competitors. This flexibility allows the building materials to expand and contract without restricting the movement of the roofing system. The increased flexibility of the Flexible DASH adhesive permits the roof to expand and contract with the building's structural components.
- **Enhanced puncture resistance:** Flexible DASH remains flexible throughout its lifecycle, providing 33–66% better puncture resistance than traditional rigid urethane adhesives. Puncture warranty enhancements are available when using Flexible DASH.
- **Enhanced hail performance:** Flexible DASH passed FM's Very Severe Hail (VSH) testing. Hail warranty enhancements are available when using Flexible DASH at full spray or 4" on-center beads.

Flexible DASH Adhesive			
Product Code	Description	Stock Status	Packaging
328043	Flexible DASH DUAL TANK (PART A)	C, S, T	Tank
328044	Flexible DASH DUAL TANK (PART B)	C, S, T	Tank

C = Carlisle, G = Greenville, S = Senatobia, T = Tooele			

After the January 1, 2020, deadline, standard DASH Adhesive will only be permitted for insulation attachment. In 2019, WeatherBond will reduce the standard DASH product offering in preparation for the January 2020 deadline. HydroBond™ Water-Based Adhesive and Aqua Base 120 Bonding Adhesive will continue to be approved adhesives on WeatherBond Fleece membranes in the field of the roof. CAV-GRIP™ III Low-VOC Adhesive/Primer will continue to be an approved adhesive for vertical wall attachment.

If you have any questions, or for more information, please contact your independent sales representative.

Sincerely,

Austin Kulp, Fleece Product Manager
