

To: WeatherBond Roofing Systems' Contractors

WeatherBond Roofing Systems is pleased to introduce its 60-mil PAS (Peel & Stick) Reinforced EPDM. Featuring time-tested and trusted 3" Pre-Applied Seam Tape, this labor-saving membrane can be used to complete adhered EPDM projects in much less time.

Test market results over the past four years indicate very high satisfaction with the ease and speed of application, as well as with the field performance after installation. PAS Reinforced EPDM is known for its added puncture resistance, and PAS rolls are available in the sizes listed below.

Product Code	Description	Stocking Location
326417	.060 PAS Rein EPDM 10' x 50' w/3" Tape	Carlisle, PA
326418	.060 PAS Rein EPDM 10' x 100' w/3" Tape	Carlisle, PA

Taking advantage of this new Peel & Stick Technology on EPDM can allow your company to complete more re-roofing projects per year, while minimizing disruption to the existing business or building occupants with the speed of application and lack of adhesive odors.

For more information, refer to the WeatherBond PAS Reinforced EPDM Membrane Technical Data Bulletin and PAS installation details.

If you have any questions, or for more information, please contact your WeatherBond Independent Sales Representative.

Sincerely,

Ronald L. Goodman
EPDM Marketing Manager
