## New WeatherBond White Reinforced EPDM February 17, 2023

### To: WeatherBond Roofing Systems' Recognized Contractors

WeatherBond Roofing Systems is pleased to introduce its new WeatherBond White Reinforced EPDM for mechanically attached and adhered roofing systems. WeatherBond's White Non-Reinforced EPDM has been performing in the field for more than 30 years and provides industry-leading UV weathering performance based on proprietary formulations. WeatherBond has fine-tuned and optimized these formulations to create a high-performance internally reinforced sheet for use on mechanically attached roofs.

Mechanically attached White Reinforced EPDM achieves a UL Class A fire rating up to a 1/2" slope over XP Polyiso and an FM 1-90 uplift rating when fastened at 6" o.c.

UL Class A fire ratings over XFP, SECUROCK®, DensDeck® Prime, and HP Recovery Board are also available for adhered applications.

Two 60-mil roll options are available: a 10' x 100' sheet and a 10' x 100' sheet with 6" Pre-Applied Seam Tape. Pre-Applied Seam Tape is a high-quality, reliable, and efficient seaming technology and WeatherBond is excited to offer a weld-free option for customers who want a white mechanically attached system.

Ordering Information		
Product Code	Description	Stocking Location
348766	White Rein EPDM 60-mil 10' x 100'	Carlisle
348781	White Rein EPDM 60-mil 10' x 100' w/ 6" Pre-Applied Seam Tape	Carlisle
