

**White EPDM Product Line Additions  
December 18, 2018**

**To: WeatherBond Roofing Systems' Independent Sales Representatives and Distributors**

WeatherBond Roofing Systems is excited to add two new accessory options to the White EPDM product lineup.

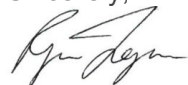

**8" White EPDM Pourable Sealer Pockets** – These 8" pockets are ideal for sealing irregular or hard-to-flash penetrations on WeatherBond White EPDM and WeatherBond TPO roofing systems. In the past, contractors were restricted to a 6"-diameter pocket; the new 8" option will allow them to tackle larger penetrations with ease.

**6" White EPDM Peel & Stick T-Joint Covers** – These 6" x 6" factory-cut T-Joint Covers consist of a top layer of White EPDM Uncured Flashing laminated to a bottom layer of Seam Tape. This product is ideal for sealing field splice intersections, horizontal-to-vertical transitions of field splices, and perimeter edge metal joints on WeatherBond White EPDM and WeatherBond TPO systems. Using pre-cut T-Joint Covers results in increased productivity and a more uniform appearance across the roof.

Description	Product Code	Packaging	Weight	Stocking Location(s)	Shelf Life
8" White Pourable Sealer Pocket	332890	12/ctn	9 lbs/ctn	C, G	6 months
6" White T-Joint Covers	332871	20/ctn	3 lbs/ctn	C, G, T	6 months
C = Carlisle, G = Greenville, S = Senatobia, T = Tooele
